

Post-Hurricane Milton Update #8
October 13, 2024 | 6:30 p.m. ET

Good evening,

I'm pleased to share some positive updates from today as we continue making progress on several fronts.

Home Inspections:

- The Owner Relations team has completed all outstanding unit inspections! We have shared exterior building photos with each HOA and board president, as well as with our in-program owners within the associations. If any concerns were identified within individual units, the team will reach out directly to each owner.

Utilities:

- LCEC had over 20 linemen on-site today, working in two separate crews—one focused on overhead lines and the other on pad-mounted transformers. Once equipment is inspected and either safed off or replaced, they will begin energizing branch circuits. We do not yet have a confirmed ETA for power restoration.

Thank you for the overwhelmingly positive feedback on our communications. We've heard from many of you over the past several days, and staying connected and keeping everyone informed remains a top priority for us. We're glad to know the updates have been helpful, and we will continue sharing information as it becomes available.

Warm regards,

Greg Spencer
President, South Seas Ownership Group
